Disaster Recovery and Business Continuity Policy v3

SAMPLE CONTENT: synthetic, not real Azentio data. Fictional product for demonstration only.

Document date: 2026-03-10 | Product version: 6.2

1. Objectives

For production services the recovery time objective (RTO) is 1 hour and the recovery point objective (RPO) is 5 minutes.

2. Architecture

Production runs multi-region active-passive. Data is replicated automatically between the primary region and a paired secondary region inside the same residency boundary.

3. Testing

Failover is tested once a year. The most recent test took place on 22 May 2026 and recovered service in 48 minutes.
