Security and Infrastructure Whitepaper v4

SAMPLE CONTENT: synthetic, not real Azentio data. Fictional product for demonstration only.

Document date: 2024-06-10 | Product version: 5.4

1. Hosting and residency

Customer data resides in a single AWS region selected at contract signing: ap-south-1 (Mumbai) or eu-central-1 (Frankfurt).

2. Encryption

Data at rest is encrypted with AES-256. Data in transit uses TLS 1.2.

3. Certifications

Meridian is ISO/IEC 27001:2013 certified (certificate valid to 31 January 2026) and undergoes annual SOC 2 Type II audits.

4. Resilience

Disaster recovery uses cross-availability-zone failover within a single region. The recovery time objective (RTO) is 4 hours and the recovery point objective (RPO) is 30 minutes.
