SOC 2 Type II Report Summary FY2025

SAMPLE CONTENT: synthetic, not real Azentio data. Fictional product for demonstration only.

Document date: 2026-02-14 | Product version: 6.2

Section 3.1 Security

Controls operated effectively with one exception: quarterly access reviews for two privileged groups were completed 9 days late. The exception was remediated.

Section 3.2 Availability

A multi-region active-passive architecture was introduced in Q3 2025. Disaster recovery failover is tested annually. The 2025 test measured a recovery time of 52 minutes. The documented objectives are an RTO of 1 hour and an RPO of 5 minutes.

Section 3.3 Confidentiality

Data at rest is encrypted with AES-256 and data in transit with TLS. Regional data residency controls were tested without exception.

The report was issued on 14 February 2026 by an independent CPA firm for the period 1 January 2025 to 31 December 2025.
