Sukuk Administration and Servicing Guide v6.2

SAMPLE CONTENT: synthetic, not real Azentio data. Fictional product for demonstration only.

Document date: 2026-03-20 | Product version: 6.2

1. Scope

MIBS provides Sukuk administration and servicing: the register of holders and positions, calculation and scheduling of periodic distributions, redemption processing and reporting to the trustee. Servicing is supported for Ijara, Murabaha, Wakala, Mudaraba and Musharaka Sukuk.

2. Exclusions

MIBS does not structure or issue Sukuk and does not perform arranger, lead manager or trustee functions. Issuance takes place outside the platform, and the final terms are loaded into MIBS for servicing.

3. Connectivity

Exchange and central securities depository connectivity is provided through partner adapters.
